

INFORMED PATIENT CONSENT FOR DENTAL PHOTOGRAPHY

In certain instances, as part of your consult, treatment planning and explanation, Dr Patel may take clinical photographs. From this you will benefit from customised, high caliber treatment as well as being provided with a direct explanation and reasons for your chosen course of treatment. In most cases it is impossible to identify you through these tooth related photos alone. If you are receiving more complicated cosmetic treatment then a headshot will be required of which you will be informed.

Clinical photographs can also play a key role in the education of medical and dental staff at all levels, and thus benefit future patients. Photos may be used for educational and teaching purposes, for case notes and documentation, open publication and marketing. You will not be identifiable when photos are used for such purposes unless specified otherwise.

If, in the future, you wish to withdraw this consent, you have the right to do so at any time by letting us know in writing. Your choice of consent level will not affect your treatment in any way. Please sign this form if you consent for your teeth related photos to be taken.
